GRP HOT – PRESSED SECTIONAL WATER TANKS.

GRP Sectional Panel Tanks are constructed from panels formed using SMC (Sheet Molding Compound) compressed by hydraulic hot-press mechanism under high temperatures of up to 150 degree Celsius. These hot-pressed panels are unparalleled when it comes to endurance, UV and heat rejection, and longevity. Using stainless steel for the interior structure and plated steel for the exterior, the panel exhibits excellent resistance to erosion. These tanks are easy to install, with on-site bolt assembly. The tank shape and volume can be freely designed with no restrictions based on site location, weather, or climate. Sectional GRP Tanks can be supplied and installed by our team of experienced engineers.

GRP LINING & GRP WORKS.

Royal International offer a comprehensive consultancy, design, installation and commissioning service.

Our Outstanding Features are:

- Lightness.
- Ease of transportation and installation.
- Weather Resistance.
- Color Fastness / Retention.
- Impact Resistance.
- Adaptability to long spans and curvatures.
- Potential translucence.

Royal International team are fully qualified and have been trained and have extensive experience conducting with the GRP lining for Sewerage Manholes, Septic Tanks, Swimming pools, Provide GRP shapes like Bath Tubs, Ceilings, Exhaust hoods, Door, Bedroom ceiling, Tables, Chairs, Manhole Cover, Closing Lids, Benches and GRP mold works for building materials, Bathroom components, Bathtub, Waterproof ceiling, Wall Panel etc.

GRP Tank Cleaning & Maintenance.

We offer comprehensive tank cleaning services, employing advanced techniques and equipment to remove residues, sediments, sludge, and other contaminants from tanks. Our team follows strict safety protocols and environmentally friendly practices to ensure efficient and thorough cleaning.

Procedures:

- **Tank Inspection:** Our expert technicians conduct detailed inspections to assess the condition of tanks and identify any structural issues, corrosion, leaks, or other potential problems. We utilize cutting-edge technology and inspection methodologies to provide accurate reports and recommendations.
- **Tank Maintenance:** We provide a wide range of tank maintenance services to extend the lifespan and optimize the performance of tanks. This includes corrosion prevention, coating and lining application, leak detection and repair, calibration, and regular maintenance schedules tailored to the specific requirements of each tank.
- **Tank Rehabilitation:** In cases where tanks have significant deteriorations, we offer tank rehabilitation solutions to restore their structural integrity and functionality. Our team can perform repairs, upgrades, and modifications to meet regulatory compliance and client needs.
- **Mission Statement:** Our mission is to provide exceptional tank cleaning and maintenance services that exceed client expectations. We strive for excellence, reliability, and innovation in every project we undertake, ensuring the highest standards of customer satisfaction, safety, and environmental responsibility.
